Model WM-I

Designed To Utilize Single Ended Beams for Tank Weighing

FEATURES:

- 1k to 10k pound capacities
- Available in stainless steel
- Eliminates check rods in most applications
- Mild steel zinc plated construction
- Bolts directly to tank or hopper leg and floor

DESCRIPTION:

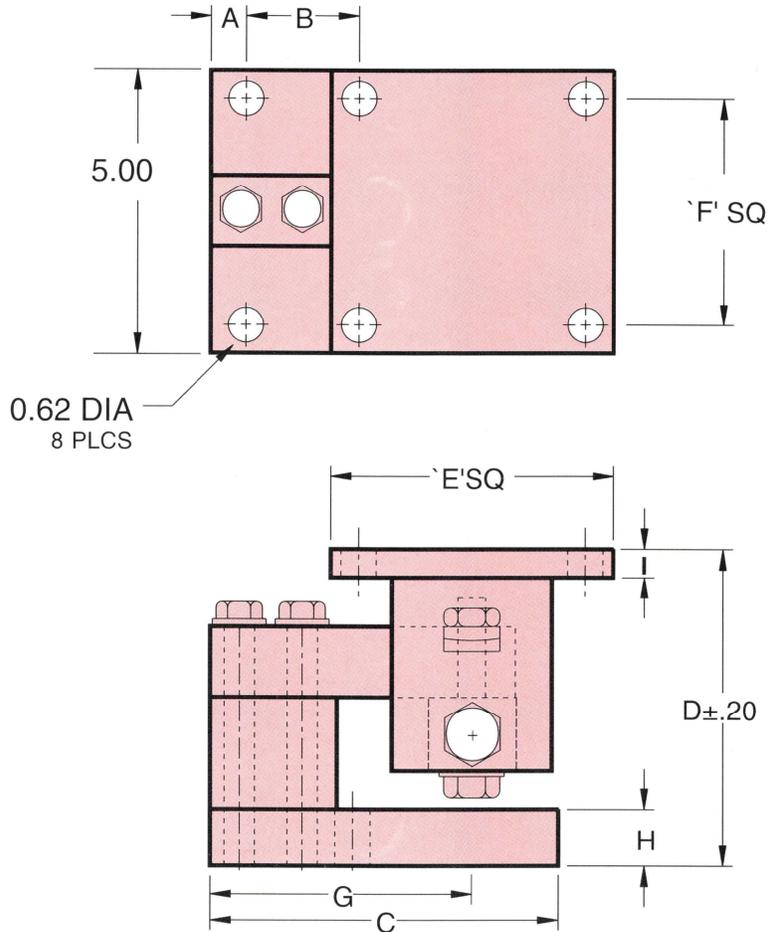

The WM-I Weighing Module is designed to utilize single ended shear beams for tank and hopper weighing. The module is available in either mild steel (WM-I) or stainless steel (SSWM-I). Loading of the cell is through a rod and spherical washer assembly that protects the cell from side load induced errors caused by tank or hopper expansion. The assembly is designed for the Artech 30210 Shear beam but can be provided to accommodate the Artech SS30510 which is a direct replacement for the HBM-BLC.
